

PRESS RELEASE

27 March 2023

CHT Group shows effective and efficient recycling solutions at the Plastics Recycling Show Europe 2023 in Amsterdam

Despite adversities such as the energy crisis and war, CHT was able to record a success in the Business Field Recycling Solutions, as the Business Field set new records with the sales it achieved, meaning that CHT Recycling Solutions remains optimistic despite a wide range of challenges.

Indeed, these challenges also present opportunities for sustainable growth that CHT plans to take advantage of. In 2023, the CHT Recycling Solutions team plans to intensify customer relationships and help customers save energy. In addition to the expertise built up over more than 15 years worldwide, new, effective and efficient product solutions from CHT Recycling Solutions will support customers in this endeavor.

This will certainly enable CHT's Recycling Solutions Team to master current challenges and strengthen its role as a global leader in the mechanical plastics recycling process. CHT Group looks forward to continuing its participation in the huge market potential of the recycling world.

From May 10-11, 2023, CHT Group will be showcasing smart auxiliaries for quality improvement and process optimization in the aqueous plastics cleaning process at its booth H10 in Hall 12 at the Plastics Recycling Show Europe (PRSE) at the Rai Congress Center in Amsterdam.

The main focus will be on:

- **TUBIWASH** as a cleaning agent for plastics recycling with a high cleaning efficiency which leads to an outstanding flake quality and thus contributes to quality improvement. In addition, products from the TUBIWASH range allow savings in resources such as water, energy and chemicals. The TUBIWASH portfolio also includes special products that support the decolorization of packaging materials.
- **TUBIFOAM** as an efficient process aid based on sustainable raw materials for the elimination of process foam. Low application quantities already promise smooth machine running and trouble-free water treatment. Mineral oil defoamers are not used in the interests of sustainability and health.
- **TUBIWET** as high-performance deaerators which ensure a density-based separation of the individual plastics by type (e.g. PET and HDPE / PP) in the flotation bath.

About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, leather, release agents, paper, agrochemicals, mining as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by more than 26 companies worldwide. In the financial year 2022, the CHT Group generated a group turnover of 705 million Euro with around 2,400 employees. In 2023, CHT celebrates its seventieth anniversary. Let's celebrate seventy years of Smart Chemistry with Character!
